

## HCCCY Accomplishments

- HCCCY has learned about the health care services in the community by hearing reports from members of the group. They use that information for networking and for improving their ability to make appropriate referrals to each other.
- Committees that address HCCCY objectives are as follows: Data/Research, Training, and Marketing/Advocacy.
- HCCCY members serve as the Community Advisory Healthy Families Georgetown.

## HCCCY Accomplishments

- HCCCY leaders in partnership with ELC Leaders and the Office of the Tideland Health Medical Staff created and maintain a comprehensive “Georgetown County Directory of Health Care Service Providers for Children and Youth.”
- We are participating in a data sharing process that tracks referrals among members. We are trying to identify crossovers and gaps in services provided in the Georgetown Community.

## **WHO WE ARE**

***A group of agencies who share a common purpose of wanting to increase the community's understanding of healthcare available to them in Georgetown County. We want to create a generation of healthy adults.***

## HCCCY Goals

GOAL 1: Increase the number of children and youth who have access to health services.

Goal 2: Increase actions that promote the connection between health and learning.

Goal 3: Increase opportunities for children and their parents to learn how to make healthy choices.

Goal 4: Increase community providers' awareness of the needs of children and youth and the resources to address those needs.
