WHO WE ARE

A group of agencies who share a common purpose of wanting to increase the community's understanding of healthcare available to them in Georgetown County. We want to create a generation of healthy adults.

WE KNOW THAT

Together we are better.
Unity is strength... when there is teamwork and collaboration, wonderful things can be achieved.

HCCCY Goals

GOAL 1: Collective Impact-Increase the ability of HCCCY members who go over and above their individual missions to collectively have an impact on the health of children and youth.

Goal 2: Access to Quality Health Services-Increase the number of children and youth who have access to quality health services.

Goal 3: Connection between Health and Learning-Increase actions that promote the connection between health and learning.

Goal 4: Making Healthy Choices-Increase opportunities for children and their parents to learn how to make healthy choices.

HCCCY Accomplishments

- HCCCY has learned about the health care services in the community by hearing reports from members of the group. They use that information for networking and for improving their ability to make appropriate referrals to each other.
- Committees that address HCCCY objectives are as follows: Data/Research, Training, and Marketing/Advocacy.
- HCCCY members serve as the Nurse Family Partnership Community Advisory Board.

HCCCY Accomplishments

- HCCCY leaders in partnership with ELC Leaders and the Office of the Tideland Health Medical Staff created and maintain a comprehensive "Georgetown County Directory of Health Care Service Providers for Children and Youth."
- Members of HCCCY collaborate with the Early Learning Physician's Advisory Council (ECPAC) to plan training for primary care physicians and other professionals.
